

IPIP-NEO

"The IPIP-NEO is not identical to the original NEO PI-R, but in my opinion it is close enough to serve as a good substitute. More and more people are beginning to use it in published research, so its acceptance is growing." - Dr. Johnson

Installation on Windows

1. Get and install Python 2.7.6 from <http://www.python.org/download/>. At the end of this step, you will have Python installed in the C:\Python27 folder.
2. Download and extract this repository. Use [this link](#) to do that.
3. Run the IPIP-NEO server by clicking on the `start-server.bat` file. After doing so, you should see something like,

4. Open the IPIP-NEO test in the browser by clicking on the `start-browser.bat` file.

Components

- Bootstrap 3.0.2
- bottle 0.11.6
- jquery.jqplot.1.0.8r1250
- Selenium 2.37.2
